

NEW RELEASE INFORMATION

EVC6-IR ELECTRONIC VALVE CONTROLLER

2.4

【Features】

- EVC's LCD full color monitor is upgraded for better visibility with a larger sized monitor. **The monitor size is enlarged to 2.4inch from 2.2 inch. (The case remains in the same size.)**
- Basic performance as a boost controller is the same as EVC6-IR. Correction map grid point: 10×10. Pressure correction range: -180~180. More precise correction is possible for modern smaller sized turbo.
- Monitor Navigation System easily leads the user to the correct setting and logging screens.
- The proven Stepping Motor is utilized as a valve unit.
