

## DMR-200D(Direct Multi Recorder)

Advanced drive recorder HKS DMR is released to handle driving for various purposes!

### Smallest Size Cameras for Drive Recorder 2 Cameras Equipped

Main Camera: 70mm x φ26mm(2Mpixel)  
2nd Camera: 40mm x φ18mm (350Kpixel)  
These are the smallest size available for drive recorder (2014.10).  
High degree of freedom for selecting an installation position.

Dimension of Main Camera (mm)

### Longest Recording Time for Drive Recorder 64GB Card Supported

New DMR monitor size is 1280 x 480 which enables efficient data compression.  
Variable rate 20~1.25fps enables 1GB/6 hours recording at longest and expanding the length of time used for monitoring and recording.

Up to 64GBmicroSDXC card are supported.

#### DMR-200D Recording Time

(The time may fluctuate depending on usage status.)

SD Capacity	8GB	16GB	32GB	64GB
fps	DMR-200D Recording Time (hr)			
20	3	6	12	24(1 day)
10	6	12	24(1 day)	48(2 day)
5	12	24(1 day)	48(2 day)	96(4 day)
2.5	24(1 day)	48(2 day)	96(4 day)	192(8 day)
1.25	48(2 day)	96(4 day)	192(8 day)	384(16 day)

### Digital Broadcast Compatible!

Electromagnetic noise that adversely affects radio or TV is contained as much as possible. Radio interference to digital broadcast, AM radio, FM radio, etc. is reduced.

	Company P's 2ch 2-tuner DTT Tuner		Company P's 4ch 4-tuner DTT Navi	
	General Drive Recorder	Antenna Level	General Drive Recorder	Antenna Level
Drive Recorder NOT in Use	61	67	DTT	DTT
Drive Recorder in Use	28	64	1-Seg	DTT

Result of In-house Test (It may be different from actual usage.)

### Viewer Display Output

Seamless image obtained by HKS' unique recording method can be checked by the special viewer software (downloadable from HKS website). The complete video including the viewer data can be exported as a file.

### Variable Cutoff

Variable cutoff feature allows continuous operation of the unit whilst the car is not running but switch off at the set voltage to protect the battery.
